- React
- Express
- Apollo Server
- Next.js
- Gatsby

Hobbies

Weightlifting, Paddleboarding, Coffee, Photography, Board Games, and Building Computers

Profile

I am a software engineer building full-stack web applications for small businesses. As a mostly self-taught developer, I am able to effectively self-manage independent projects, as well as collaborate in a team setting. I have built small personal websites and hobby projects, and am currently building a SaaS application.

I am currently looking for an entry, or mid-level position with a small company happy to invest in my continued growth as a developer. See projects I have built on my personal website, joecodes.io.

Employment History

Software Developer - Intern, Persistence Athletics

Jan 2021 — Present 　　📍 Seattle, WA

Researched and designed the implementation of the Persist App, a content-management system for gyms and trainers in the fitness industry. The app is built with Blitz.js, a full-stack framework built on React, Next.js, and the Prisma ORM. This project is currently in development.

Package Delivery Driver, United Parcel Service

Jan 2019 — Present 　　📍 Portland, OR

Co-Owner and Operations Manager, Cascadia Strength and Conditioning

Mar 2016 — Jan 2018 　　📍 Beaverton, OR

- Developed a formal business plan and planned the logistics and setup of a small-business facility.
- Implemented marketing strategies to create memberships and run weekly schedules.
- Coached individual and group fitness classes creating a positive environment to develop individuals and assist them in reaching personal fitness goals.

Logistics Supervisor, United Parcel Service

Mar 2017 — Aug 2017 　　📍 Portland, OR

- Managed 15-24 employees and a department shift to meet or exceed established standards for accuracy, productivity, and efficiency.
- Worked at a high technical proficiency to run a mostly automated sorting facility.
- File reports and complete evaluations to ensure all employees adhered to safety policies and procedures in full compliance with corporate and labor requirements.

Education

Team Treehouse, Full-Stack Javascript Bootcamp

Jun 2019 — Apr 2020 　　📍 Remote

The Treehouse Full Stack JavaScript Techdegree is a fully remote online bootcamp providing a comprehensive education in the basics of the JavaScript language and its use in front end user experience and back end application development with Node and Express.

Pacific University, BS: Business Administration

Aug 2013 — May 2016 　　📍 Forest Grove

Completed junior year in the spring of 2016 having completed mostly science courses. Accumulated 145.5 credit hours with a cumulative GPA 3.019.
